

# EMOTEST

LABORATORIO  
DI ANALISI CLINICHE  
PRIVATO

Accreditato SSN Livello di Eccellenza

## USER'S GUIDE

Contains:

- information on the service offered;
- method for proper collection of sample;
- behavioural suggestions for the period before and after collecting the blood sample.

Updated on 15/09/2022

Written by Laboratory personnel

## **CONTENTS**

<b>1) Purpose of the guide</b>	<b>p. 3</b>
<b>2) Objectives and Basic Criteria</b>	<b>p. 4</b>
<b>3) User's rights and duties</b>	<b>p. 4</b>
<b>4) Operating Unit</b>	<b>pg 5</b>

<b>6) Admissions and collecting blood sample</b>	<b>p. 7</b>
<b>7) Costs, time and payment method</b>	<b>p. 8</b>
<b>8) Collecting reports</b>	<b>p. 13</b>
<b>9) Privacy and data processing</b>	<b>p. 13</b>
<b>10) General methods and specifications for proper drawing</b>	<b>p. 14</b>
<b>11) Suggestions on how to behave before and after drawing</b>	<b>p. 16</b>
<b>12) Complete list of tests and price list</b>	<b>p. 19</b>

# 1. Purpose of the Guide

This work is intended to be a useful information tool available to users to introduce the service that Emotest offers.

It was therefore deemed opportune in this guide to analytically discuss the following topics concerning:

- ❖ all information that might be of service to the users to learn how the laboratory operates through, for example, the description of the access schedule, the organisation chart, the drawing and report collection methods, and the services provided.
- ❖ the suggestions on how to behave to allow the patient of any age undergoing blood drawing to go through this experience without trauma, as often occurs.
- ❖ the suggestions to avoid any of those complications that might arise following the drawing, which must in any case be considered as highly improbably, of modest entity and temporary in nature.

This document also indicates the proper ways to behave if one should undergo the different types of drawing.

It is important to remember that there is no correct analysis without a correct drawing; therefore, every user - in his or her own interest - should collaborate with Laboratory personnel so that reliable data can be produced.

We will therefore be grateful to everyone who wants to collaborate with us so we can do our job in the best way possible, aware that this can serve to prevent many annoying problems such as, for example:

- drawing repetitions;
- incorrect analyses because they are made on an unsuitable sample;
- incorrect or confusing interpretations of laboratory data;

etc.

Aware as we are that all of us can be both patients/users and operators at different times, it is unquestionable that if our work is to be useful for both, we must by necessity exchange views in a constructive manner, also by - for example - using this guide.

It is therefore reiterated that in the intentions of all of us, this guide is meant to be a useful tool for discussion between laboratory personnel and every one who continues to offer us their trust, and to whom we want to send our heartfelt thanks.

## 2.Objectives of the Service and basic criteria

- The quality of the Laboratory's services is guaranteed by the professionalism of the operators and by their attendance of ECM training courses, by quality control through execution of the Internal Quality Control (IQC) and of the periodic quality control of the VEQ (external quality control of the Marches Region).
- Examination of biological samples, interpretation, and consultancy for the patient's prevention, monitoring and treatment.
- Meeting the clinical needs of the users: DOCTORS and PATIENTS
- The same services are provided to all citizens who request them without discriminations of age; sex; race; nationality; religion; economic, physical, or psychic conditions; or political opinions.
- All citizens are guaranteed treatment marked by utmost respect and maximum readiness to help.
- Any type of collaboration in the form of observation and suggestion that might improve the provided service is welcomed and hoped-for.
- The main undertaking of the personnel is aimed at ensuring the user has effective and efficient services together with attention paid to the effectiveness of the Service and to its improvement in terms of reducing waiting time, appropriate diagnostics and treatment, and humanisation in managing the users.

## 3.User's rights

- Compliance with the privacy legislation pursuant to Art. 13 of European Union Regulation 2016/679/EU on the "subject of protecting personal data" at both admissions and in the sampling room.
- Request for preventive informed consent to make the following determinations: HIV and drugs of abuse.
- Exemption from payment of the subsidised treatment charge in those cases provided for by the law in force.
- Delivery of the analytical report in the time frame established at the time of admission

### 3.1. User's duties

- If the user plans to make use of the subsidies provided for by the Italian National Health Service, show up at admissions with the referral form of the General Medicine Practitioner.
- Payment of the subsidised treatment charge according to the regional rate table.
- Respect for the facility, the furnishings and the laboratory personnel.

## 4. Emotest Analysis Laboratory Operating Unit

Operator	Role	Sector
Dr. Daniela Belleggia	Director, Biologist Specialised in Clinical Biochemistry	Clinical Chemistry, Haematology, Coagulation, Food Intolerances
Dr. Arianna Marcantoni	Biologist Specialised in Clinical Biochemistry	Clinical Chemistry, Immunometry, Haematology and Coagulation, Administration
Dr. Maite Marcantoni	Biotechnologist, PhD	Project Management, Clinical Operations, Quality
Dr. Madeira Rocchi	Biologist and Laboratory Technician	Microbiology, Parasitology, Admissions
Dr. Cristiana Presenti	Biologist	Clinical Chemistry, Internal Privacy Manager, Admissions
Dr. Francesca Meloni	Biologist	Bacteriology, Microbiology, Parasitology, Admissions
Dr. Elisa Rossi	Biologist	Haematology, Coagulation
Dr. Federica Lupi	Biologist	Molecular Biology, Clinical Chemistry
Dr. Giorgia Di Donato	Biotechnologist	Bacteriology, Microbiology, Parasitology
Dr. Emilia Teodori	Nurse	Sample collections on- site and at home, Nursing Care, Admissions

Dr. Mattia Vittori	Nurse	Sample collections on-site and at home, Nursing Care
Dr. Francesco Egidi	Nurse	Sampling Room Manager, Sample collections on-site and at home
Dr. Silvia Fidani	Obstetrician	Sample collections on-site and at home, obstetric services, admissions
Dr. Valeria Eusebi	Obstetrician	Sample collections on-site and at home, obstetric services, admissions
Ms Vanessa Achilli	Auxiliary	Person in charge of Cleaning

## 5.1. Access hours

Open to the public	Samples collected	From Monday to Saturday 7 - 10 am
	Collection of Reports	From Monday to Friday 4 - 7 pm Saturday 12 - 2 pm
	Information	From Monday to Saturday 9.30 am - 2 pm From Monday to Friday 4 - 7 pm

## 5.2. Access requirements

With referral form:	<ul style="list-style-type: none"> <li>• First name</li> <li>• Surname</li> <li>• Date and place of birth</li> <li>• Home address</li> <li>• National health service card (exemption, if any)</li> <li>• List of requested analyses (max. 8 tests each)</li> <li>• Date of prescription</li> <li>• Stamp and signature of doctor</li> </ul>
For tests as private individual:	<ul style="list-style-type: none"> <li>• List of desired tests</li> <li>• Personal information reference</li> </ul>

## 6. Admissions and collecting blood sample

With free access, without reservation.

Only food intolerance tests are reserved by phoning 0734/968263.

- Take the ticket with progressive number from the dispensing machine at the entrance;
- Wait for your number to be called by the admissions staff;
- Show the doctor's request of formulate your personal request so the data can be entered into the admissions terminal;
- Deliver any biological materials (e.g. urine, faeces, etc.);
- Collect the ID labels to deliver in the sampling room;
- Payment of the subsidised treatment charge or amounts due at admissions
- Collect the ID ticket to collect the report;
- Go to the sampling room and wait for your turn.

## 7. Costs, time and payment method

The laboratory has an agreement with the National Health Service, so all citizens who have a referral form can gain free access under the same conditions as those of the public service. Tests can also be performed as private individuals, paying the full charge for the service. The rates are shown at the end of the guide, in annex 1. The subsidised treatment charge is paid at admissions. It can be paid in cash or by cheque, ATM card or credit card.

Some patient categories are entitled to full exemption from paying the subsidised treatment charge:

### 7.1. **EXEMPTION FOR INCOME**

The general practitioner is required to indicate on the referral form the exemption code that the patient must procure from the competent Local Health Authority by self-certification. This is the sole competence and civil and criminal responsibility of the citizen.

Pursuant to Italian Law 537/93 as amended (Italian Law 724/94 and 549/95), the following patient categories are entitled to exemption for income:

- Children under the age of 6 belonging to a family unit with income below Euro 36,151.98 (according to the last tax return);
- Adults over the age of 65 belonging to a family unit with income below Euro 36,151.98 (according to the last tax return);
- Adults between the ages of 60 and 65 who receive a social pension, whose income is lower than Euro 8,236.31, or Euro 11,362.05 with dependent spouse, or increasing the income by Euro 516.46 for each dependent child;
- Family members dependent on social pensioners;
- Unemployed registered in the job listings whose income is lower than Euro 8,236.31, or Euro 11,362.05 with dependent spouse, or increasing the income by Euro 516.46 for each dependent child;

(Unemployed means a person who has lost a prior job and is looking for new employment)

- Family members dependent on unemployed as described above.

## **7.2. EXEMPTION FOR PATIENTS UNDERGOING ESTROPROGESTINIC THERAPY**

(Resolution of the Marche Regional Council no. 1335 TS/SSO of 8/5/1992 LR 42/80)

The following tests are exempt from subsidised treatment charges annually for patients in estroprogestinic therapy:

- haemochrome
- glycemia
- azotemia
- Glutamate-Oxalacetic Transaminase
- transaminase GPT
- total cholesterol
- HDL cholesterol
- triglycerides
- Antithrombin III
- Urine test

## **7.3 EXEMPTION FOR RESPONSIBLE MOTHERHOOD**

### **7.3.1. Specialist services for women**

- a. 89.01 - HISTORY AND ASSESSMENT, DEFINED SHORT-TERM: Pre-conceptional gynaecological consulting;
- b. 90.49.3 - ANTIBODIES ANTI ERYTHROCYTES [indirect Coombs Test]: in the event of risk of isoimmunisation;
- c. 91.26.4 - GERMAN MEASLES VIRUS ANTIBODIES (Ig G, Ig M);
- d. 91.09.4 - TOXOPLASMOSIS ANTIBODIES (Enzyme immunoAssay) (Ig G, Ig M);
- e. 90.62.2 - HAEMOCHROME: Hb, GR, GB, HCT, PLT, IND. DERIV., F. L.;
- f. 90.74.3 - ERYTHROCYTE OSMOTIC RESISTANCE (Simmel Test)  
in the event there is a reduction of the average cellular volume and morphological alterations of the erythrocytes;
- g. 90.66.5 - Hb - ABNORMAL HAEMOGLOBIN (HbS, HbD, HbH, etc.):  
in the event there is a reduction of the average cellular volume and morphological alterations of the erythrocytes;
- h. 91.38.5 - VAGINAL CERVICAL CYTOLOGY SCREENING [PAP test];

### **7.3.2. Specialist services for men**

- a. 90.62.2 - HAEMOCHROME: Hb, GR, GB, HCT, PLT, IND. DERIV., F. L.:  
in case of woman with heterozygote phenotype for haemoglobinopathies;
- b. 90.74.3 - ERYTHROCYTE OSMOTIC RESISTANCE (Simmel Test):  
in case of woman with heterozygote phenotype for haemoglobinopathies;
- c. 90.66.5 - Hb - ABNORMAL HAEMOGLOBIN (HbS, HbD, HbH, etc.):  
in case of woman with heterozygote phenotype for haemoglobinopathies;

### 7.3.3. Specialist services for couples

- a. 91.22.4 - ACQUIRED IMMUNODEF. VIRUS [HIV 1-2] ANTIBODIES H –;
- b. 90.65.3 - BLOOD GROUP AB0 and Rh (D);
- c. 91.10.5 - TREPONEMA PALLIDUM ANTIBODIES (Quantity search by Treponema Pallidum Hemoagglutination) [TPHA];
- d. 91.11.1 - TREPONEMA PALLIDUM ANTICARDIOLIPIN ANTIBODIES (Flocculation) [VDRL] [RPR];

### 7.3.4. In the event of repeated abortions or prior pathologies of pregnancy with perinatal death, and upon prescription of the gynaecologist or geneticist

- a. 89.01 - HISTORY AND ASSESSMENT, DEFINED SHORT-TERM: Genetic consultancy;
- b. 88.79.7 - TOTAL VAGINAL ULTRASOUND SCAN;
- c. 68.12.1 - HYSTEROSCOPY, Excluding: Biopsy with dilation of cervical canal;
- d. 68.16.1 - BIOPSY OF UTERINE BODY: Endoscopic biopsy (hysteroscopy) of the endometrium;
- e. 91.31.2 - LYMPHOCYTIC METAPHASE KARYOTYPE 1 Banding technique (resolution no lower than 320 bands): for the couple;
- f. 90.46.5 - LUPUS-LIKE ANTICOAGULANT (LAC);
- g. 90.47.5 - ANTICARDIOLIPIN ANTIBODIES (IgG, IgA, IgM);
- h. 90.51.4 - ANTI MICROSOMES (ABTMS) OR ANTI THYREOPEROXYDASE ANTIBODIES (ABTPO);
- i. 90.54.4 - ANTI THYROGLOBULIN ANTIBODIES (AbTg);

## **7.4. EXEMPTION FOR PREGNANCY**

In those cases of pregnancy at risk, including gestosis syndrome and pregnancy-induced hypertension, the declaration of “pregnancy at risk” is to be put on the test request by a specialist in outpatient, advisory centre or hospital obstetrics and gynaecology.

At the beginning of the pregnancy, possibly before the 13th week and in any case at the first check-up:

- a. 90.65.3 BLOOD TYPE ABO AND Rh (D), if not performed in pre-conceptional function;
- b. 90.62.2 HAEMOCHROME: Hb, GR, GB, HCT, PLT, IND. DERIV., F. L.H;
- c. 90.09.2 ASPARTATE AMINOTRANSFERASE (AST) (GLUTAMATE-OXALACETIC TRANSAMINASE) [S];
- d. 90.04.5 ALANINE AMINOTRANSFERASE (ALT) (GLUTAMATE-PYRUVATE TRANSAMINASE) [S/U];
- e. 91.26.4 GERMAN MEASLES VIRUS ANTIBODIES: in case of negative IgG, by the 17th week;
- f. 91.09.4 TOXOPLASMOSIS ANTIBODIES (Enzyme immunoAssay): in case of negative IgG, repeat every 30-40 days until delivery;
- g. 91.10.5 TREPONEMA PALLIDUM ANTIBODIES (Quantity search by passive hemoagglutination) [TPHA]: if not performed in pre-conceptional function extended to partner;

- h. 91.11.1 TREPONEMA PALLIDUM ANTIBODIES;
  - i. CARDIOLIPIN (Flocculation) [VDRL] [RPR]: if not performed in pre-conceptual function extended to partner;
  - j. 91.22.4 ACQUIRED ACQUIRED [HIV 1-2] ANTIBODIES;
  - k. 90.27.1 GLUCOSE [S/P/U/dU/La];
  - l. 90.44.3 URINE CHEMICAL-PHYSICAL AND MICROSCOPIC TEST;
  - m. 88.78 ECOGRAFIA OSTETRICA;
  - n. 90.49.3 ANTIBODIES ANTI ERYTHROCYTES [indirect Coombs test]: in the case of negative Rh women at risk of immunisation, the test must be repeated every month; in the case of AB0 incompatibility, the test must be repeated at the 34th-36th week.
- 

Between the 14th and 18th week:

90.44.3 URINE CHEMICAL-PHYSICAL AND MICROSCOPIC TEST (\*)

-----

Between the 19th and 23rd week:

90.44.3 URINE CHEMICAL-PHYSICAL AND MICROSCOPIC TEST (\*)

88.78 OBSTETRIC ULTRASOUND SCAN

-----

Between the 24th and 27th week:

90.27.1 GLUCOSE [S/P/U/dU/La]

90.44.3 URINE CHEMICAL-PHYSICAL AND MICROSCOPIC TEST (\*)

-----

Between the 28th and 32nd week:

90.62.2. HAEMOCHROME: Hb, GR, GB, HCT, PLT, IND. DERIV., F. L.

90.22.3 FERRITIN [P/(Sg)Er]: in the case of reduced average blood cell volume

90.44.3 URINE CHEMICAL-PHYSICAL AND MICROSCOPIC TEST (\*)

88.78 OBSTETRIC ULTRASOUND SCAN

-----

Between the 33rd and 37th week

91.18.5 HEPATITIS B VIRUS [HBV] ANTIGEN HbsAg

91.19.5 HEPATITIS C VIRUS [HCV] ANTIBODIES

90.62.2 HAEMOCHROME: Hb, GR, GB, HCT, PLT, IND. DERIV., F. L.

90.44.3 URINE CHEMICAL-PHYSICAL AND MICROSCOPIC TEST (\*)

91.22.4 ACQUIRED ACQUIRED [HIV 1-2] ANTIBODIES in case of anamnestic risk

-----

Between the 38th and 40th week

90.44.3 URINE CHEMICAL-PHYSICAL AND MICROSCOPIC TEST (\*)

-----

From the 41st week

88.78 OBSTETRIC ULTRASOUND SCAN: upon the specific request of the specialist

75.34.1 CARDIOTOCOGRAPHY: upon the specific request of the specialist; if necessary, monitor until delivery

-----

(\*) In case of significant bacteriuria

90.94.2 CULTURAL URINE TEST [URINE CULTURE] Complete search for micro-organisms and pathogenic yeasts. Included: bacterial count

-----

IN THE CASE OF THREAT OF ABORTION, ALL SPECIALISTIC SERVICES NECESSARY TO MONITOR EVOLUTION OF THE PREGNANCY ARE TO BE INCLUDED.

## **7.5. EXEMPTION FOR PATHOLOGY**

Patients suffering from particular pathologies can use the exemption from participating in the cost for healthcare services related to each illness.

In identifying the illness conditions, the Italian Ministry of Health mainly takes into account the clinical seriousness and the degree of invalidity that the pathology entails. The services considered free of charge are those considered appropriate in order to monitor the evolution of the illness and the effectiveness for preventing further deterioration, as well as services necessary to resort to with a particularly high frequency.

Therefore, particular free tests are provided for each pathology and others are not, as pointed out in Italian Ministerial Decree no. 329 of 28 May 1999, published in the ordinary supplement to Official Journal no. 266 of 25 September 1999.

This type of exemption is always to be certified by the doctor.

## 8. Collecting reports

- The reports are collected at the Admissions office from Monday to Friday, from 4 to 7 pm, and on Saturdays from 12 to 2 pm;
- the patient is given a sheet showing the date the results will be delivered at the time of admission;
- if it is impossible for the patient to collect the report in person, he or she can delegate a third party by signing the specific authorisation pre-printed on the sheet;
- the report can be viewed online after requesting access credentials at the time of admission;
- patients in OAT (oral anti-coagulant therapy) can collect the report at the analysis laboratory or be informed by phone on the same day the blood sample is collected, from 12 to 2 pm;
- the general practitioner may request the result of the test requests for his or her patients by phone;
- the invoice for payment of the fees will be issued with the report.

## 9. Privacy and data processing

Pursuant to Art. 13 of European Union Regulation 2016/679/EU on the “subject of protecting personal data”, the patient's data are protected and processed only subject to information and authorisation to do so.

## **10. General methods and specifications for proper collection of sample**

### **10.1. GENERAL INFORMATION FOR PREPARING COLLECTION OF THE BLOOD SAMPLE:**

In order to guarantee the most standardised conditions possible, prevent interferences in the analyses and reduce pre-analytical variability, we recommend:

- To not perform intensive physical activity on the days prior to collection of the sample;
- Fast for at least 8-12 hours before collection of the blood sample. Smoking and taking unnecessary drugs is recommended against unless otherwise instructed by the general practitioner. Meals prior to fasting should be the usual ones, therefore without excesses or particular restrictions;
- The patient should remain seated in the waiting room, should not interrupt fasting or smoke; should he or she feel ill, the health personnel is to be immediately notified;
- Inform the medical personnel to perform the operations of affixing the tourniquet and disinfecting the skin; while collecting the blood sample, do not make any movement that might shift the needle or make it come out of the vein, and wait for the health personnel to confirm they have completed the collection.
- For the therapeutic monitoring of drugs, the blood sample is to be collected at a time appropriate for taking the drug;
- Fasting is unnecessary for coagulation tests (e.g. PT, PTT, etc.);
- To determine the "prolactin", it is necessary to collect the sample at least 2 hours after waking up.

### **10.2. SUGGESTIONS ON HOW TO BEHAVE AFTER COLLECTING THE BLOOD SAMPLE:**

- Keep the sterile cotton pressed on the wound to allow the blood to rapidly coagulate;
- Wait for the medical personnel to verify the patient's conditions before leaving;
- As soon as the sample is taken, stay in the same sampling position until the medical personnel allow you to leave after having checked that there is no blood loss from the wound and the user's state of awareness;
- Notify the medical personnel of your state of health;
- After receiving permission to leave from the personnel, stay a short period of time in the waiting room to allow the laboratory personnel to check your state of awareness again by talking to you;

- Notify the laboratory personnel of your state of health;
- Leave the waiting room only after having received permission to do so from the laboratory personnel;
- Do not get into your car until you have taken a short stroll outdoors;
- Check your state of health before getting into your car;

### **Notes on possible complications:**

Should any complications arise, such as unexpected bleeding, immediately return to the laboratory and notify the medical personnel;

If the subject has previously displayed attacks similar to epileptic attacks and/or loss of consciousness, it is advisable that he or she be accompanied before, during and after collecting the sample by personnel in charge of their surveillance.

### **Closing comments:**

We are sure that even if the blood sample collection operation is without dispute traumatic, it may in any case be totally innocuous, above all if one places himself/herself in the perspective of collaborating with the medical personnel who, having gained considerable experience in this operation, may complete it quickly, in absolutely safety and in the best way to allow the laboratory personnel to proceed to the following analytical steps.

# 11. Collection Methods and Transportation of Biological Samples

## ❖ Culture Tests

It is necessary to have stopped any type of antibiotic treatment for at least one week for all culture tests.

## ❖ Urine Tests

- **STANDARD URINE:** after carefully washing the external genitals, eliminate the initial portion and collect the intermediate portion of the first urination of the morning. It is recommended to not carry out physical exertion, to abstain from sexual relations during the 12 hours prior to the collection and, for women of a fertile age, to avoid collection during the menstrual period. Do not take VITAMIN C on the days prior to performing the test since a high concentration of ascorbic acid ( $> 40$  mg/dl) inhibits determination of the haemoglobin and glucose.
- **URINE CULTURE:** If possible, it is necessary to collect the urine before administration of antibiotics. The urine must be collected in a sterile container with large opening. It is recommended to perform the test on the first urine of the morning, following the procedure described above. For children, the collection material consists of a sterile adhesive plastic bag. To collect the urine, carefully wash the region above the pubic and perinatal areas, and the external genitals with soap and water. Apply the bag by making it stick to the perineum and the region above the pubic area. After urinating, remove the bag and hermetically seal it. Send the bag to the laboratory within 1 hour or store it at  $4^{\circ}\text{C}$  for no more than 6 hours.
- **URINE CYTOLOGY TEST:** the urine must be collected in a sterile container with large opening. It is recommended to perform the test on the second urine of the morning, following this procedure:
  - carefully wash and dry the sex organs;
  - discard the first discharge of urine;
  - collect the urine directly in the sterile container.

Avoid touching the interior of the container with your hands.

## ❖ 24H Collection of Urine

The first urine of the morning is discarded. Starting from the second, collect all urine of every urination in the special container, including the first urine of the morning of the second day.

(EXAMS Clearance of the Creatinine, Urine Catecholamine, 24H proteinuria)

## ❖ Faeces Tests

- STOOL CULTURE: Collect the faeces possibly at the onset of the enteropathy, when they are diarrhoeic, and before the antibiotic treatment begins. The faeces must be collected with a teaspoon in a sterile container while avoiding contamination with urine, and the amount must be equivalent to a “knob”.
- SEARCH FOR OCCULT BLOOD: To perform the test, an amount of faeces equivalent to a “knob” is necessary. A meat-free diet is unnecessary. The sample can be preserved at 2-8°C for 24 hours. It is recommended to repeat the test on 3 samples collected at different times.

## ❖ Sperm Tests

- SPERMIOGRAM: the patient must abstain from sexual relations during the 3-4 days prior to collection of the sample. The sperm must be collected after carefully washing the external genitals and hands, and the collection must be made directly in a sterile container.
- SPERM CULTURE: the sperm must be collected as described above. The patient must have stopped antibiotic treatments for at least one week.

## ❖ Tests performed by swabbing

- PHARYNGEAL SWAB: if possible, it is necessary to swab before administration of antibiotics. It is necessary to fast for at least 8 hours before swabbing.
- URETHRAL SWAB: the patient should abstain from sexual relations during the 24 hours prior to the test, should have stopped antibiotic treatments for at least one week, and should not have urinated during the last 3 hours before the swabbing.
- VAGINAL SWAB: the patient should abstain from sexual relations during the 24 hours prior to the test, should have stopped antibiotic treatments for at least one week, and should not be in the menstrual period.

## ❖ Tests performed with adhesive tape collection

- SCOTCH TEST: In the morning, right after waking up and before performing any personal hygiene, place the transparent adhesive tape on the anal orifice. Make the transparent adhesive tape adhere to a slide that the laboratory will give you. Perform the test for 3 mornings in a row.

Note: These rules of conduct must be considered valid unless otherwise indicated by a specific medical instruction.

## **QUESTIONNAIRE FOR MEASURING THE USERS' LEVEL OF SATISFACTION**

<b>QUESTION</b>	<b>ANSWER SCORE</b>				<b>NOTES, IF ANY</b>
FINDS THE USER'S GUIDE HELPFUL	NO	NOT MUCH	ENOUGH	VERY MUCH	
IS SATISFIED WITH HOW THE BLOOD SAMPLE IS COLLECTED	NO	NOT MUCH	ENOUGH	VERY MUCH	
IS SATISFIED WITH THE REPORT DELIVERY TIME FRAME	NO	NOT MUCH	ENOUGH	VERY MUCH	
FEELS SATISFIED WITH THE RESULTS PROVIDED (RELIABILITY OF DATA)	NO	NOT MUCH	ENOUGH	VERY MUCH	
FEELS SATISFIED WITH THE INFORMATION RECEIVED FROM THE LABORATORY PERSONNEL	NO	NOT MUCH	ENOUGH	VERY MUCH	
<b>SUGGESTIONS</b>
